

SE Lab 4 – Vibe Coding Submission

Student: Shridhar Umesh Golipalle

Project: 2048 – Scenario 14

GitHub Repository: https://github.com/SHRI427161/14_2048

Completed Tasks

Task 1 – Correct Merge Semantics

Fixed the merge algorithm so an original tile can participate in at most one merge during a single move.

Task 2 – Game-State Handling

Verified win detection, no-move detection, and correct tile creation behavior for unchanged moves.

Task 3 – Undo and Best Score

Implemented one-level undo with restoration of board and score, and tracked the best score for the current run.

Task 4 – Move Feedback

Added concise action-level feedback for successful moves and merges without triggering feedback from internal board functions.
